UTNA received two students as part of International 300 scholarships program for Haiti.

- 102 scholarships were offered for studies in Universidades Tecnológicas y Politécnicas e Institutos Tecnológicos as part of SEP belonging to the Tecnológico Nacional de México (TNM).

The educational program "300 Scholarships for Haiti" is the result of an agreement between the SRE, through the Mexican Agency for International Development Cooperation, the Ministry of Public Education (SEP) and the Ministry of Foreign and Religious Affairs of the Republic of Haiti, for young people of that country to acquire knowledge in areas that the government of that country has identified as priorities.

In the third edition of this grant, the Universidad Tecnológica del Norte de Aguascalientes received two students to study in areas: civil, mining, mechanical, networking, telecommunications, multimedia and renewable energy. Keren A. Saint-Hilarie and Vincent Clerson Clervius Verdieu who are scholarship holders in this institution will remain four years in Aguascalientes and they will study Engineering in Information Technology and Electronic Commerce Multimedia area (TICMyCE).

It is important to mention that the beneficiaries will study in 41 technological universities and polytechnic institutions, located in 18 states of the country. Prior to their arrival at UTNA, the students had an intensive Spanish language course lasting for 3 months in the state of Guerrero to achieve their integration with minimal difficulty to all courses as part of their academic load, also to become familiarized with Mexican culture.

Students are integrated into second quarter of their career, which they have the support and advice from academic tutors and the area of languages to make their stay a successful experience and enable them to develop their full potential so they fulfill their expectations during their stay at UTNA. Our institution strives daily to provide a comprehensive education and quality expertise up to the market demands. The university will continue developing projects to consolidate its reputation as one of the best in Aguascalientes.
